# Olshan Foundation Watering System

24/7 Defense Against Drought Related Foundation Damage

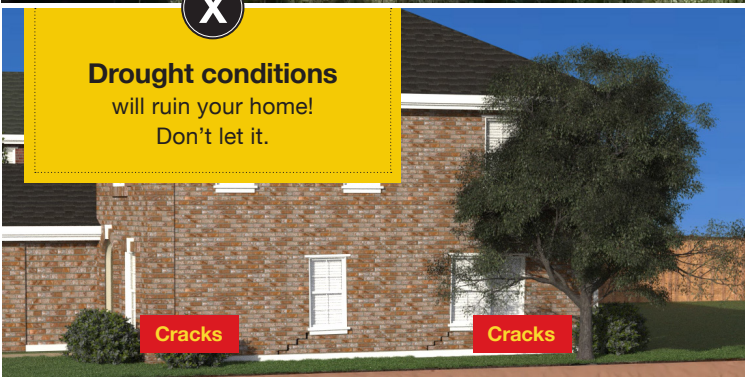

X

**Poor soil conditions** are the leading cause of foundation problems in Texas.

X

**Drought conditions** will ruin your home! Don't let it.

## Protect Your Foundation.

✓

**Hidden Olshan Foundation Watering System** helps you maintain healthy soil conditions year-round. Takes the guesswork out of watering your foundation.

**Olshan**  
Since 1933  
Foundation Solutions

## 5 Easy Steps:

**1. Trench.** We dig a trench around your foundation, a few inches away from the exterior walls and up to 18 inches deep underground.

**2. Deep Hydration.** A dripline is installed inside the trench with moisture emitters. Moisture emitters are spaced every 12 inches to help maintain consistent moisture levels.

**3. Take Control.** Fast-to-access controller is installed inside an access box allowing you to maintain your watering plan effectively throughout the seasons.

**4. Hidden.** Your underground system will be covered and filled with dirt allowing you to keep your lawn looking beautiful.

**5. Maintain.** Take the guesswork out of watering your foundation. Scheduled, consistent drip-watering allows you to conserve water and also helps prevent over-watering.

**Outdoor Root Barrier.** Root barriers help maintain a healthy soil moisture balance while also protecting against harmful roots

\*Available annual check-up keeps your system running smooth.
